📁 Portfolio

PROFESSIONAL SUMMARY

Results-driven B.Tech graduate with hands-on expertise in full-stack web development, specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js). Proficient in building responsive, user-centric web applications using HTML5, CSS3, JavaScript, and Bootstrap, with additional experience in Python for scripting and backend development. Adept at designing scalable REST APIs, managing NoSQL databases, and delivering clean, maintainable code. Passionate about leveraging modern technologies to solve real-world problems and eager to contribute to dynamic development teams in a fast-paced environment.

PROJECTS

AI-component Generator 🗄 | React, Node.js, Express.js, MongoDB, JWT 2025

- Developed an AI-driven component generator that converts natural-language prompts into responsive HTML/CSS/Tailwind code, improving developer productivity by 80 percent.
- Integrated Google Gemini API for intelligent prompt parsing and fenced-code extraction; implemented secure API key management and modular architecture.
- Enhanced UI/UX using Monaco Editor, React Select, and React Toastify to provide real-time previews and error handling.

MediLab+ 🗄 | React, Node.js, Express.js, MongoDB, JWT 2025

- Full-stack medical appointment booking system built with the MERN stack (MongoDB, Express.js, React, Node.js) for a medical diagnostics platform to showcase services, departments, and doctor profiles.
- Implemented mobile-first design principles, achieving cross-browser compatibility and 99 percent Lighthouse accessibility score.
- MediLab+ provides a complete solution for managing medical appointments with separate interfaces for patients, doctors, and administrators.

Machmaker-CRM 🗄 | React.js, Tailwind CSS, R.Router, , Node.js, Express.js, JWT , OpenAI , JSON 2026

- Developed a full-stack Matchmaker CRM Dashboard to manage matrimonial customer profiles and streamline matchmaking operations
- Implemented an intelligent compatibility scoring algorithm with AI-powered match recommendations and personalized introductions .
- Implemented an intelligent compatibility scoring algorithm with AI-powered match recommendations and personalized introductions
- Deployed app on Render, vercel and managed source control via Git/GitHub.

Task Manager 🗄 | React Native, Expo, Redux, Node.js, Express, PostgreSQL, JWT, Axios 2026

- a full-stack mobile project and task management app using React Native (Expo) for the frontend and Node.js/Express for the backend.
- Users can sign up/login with OTP authentication, create and delete projects, and manage tasks with status updates, due dates, and delete functionality.
- Implemented Redux for state management, API integration with Axios, database storage, smooth navigation, loading indicators, and light/dark mode for a polished user experience..
- Deployed app on Render and managed source control via Git/GitHub.

TECHNICAL SKILLS

Backend: Node.js, Express.js, MongoDB, REST API

Frontend: React.js, HTML5, CSS3, Tailwind CSS, JavaScript

Languages: python, JavaScript, C

Testing : Postman

Tools/Platforms: Git, GitHub, VS Code, , Postman,
